*Manish - Indian Marble Lotus Planter*

## Discovered for You.

### Product description

India's national Lotus flower comes into full bloom with these spectacular marble planters. The sacred lotus is a symbol of beauty, prosperity and fertility, and all these traits appear in the immaculate detailing of the Manish planter.

Handcrafted by Indian sculptors in Rajasthan, Gather Co worked closely alongside skilled craftspeople to ensure the Manish was designed specifically for Australian landscapes. The result is a plump low bowl, an intricate, round planter inspired by India and built for Australia.

# Tips For Installation

## Considerations

When choosing any piece within our Marble Planter collection, consideration must be given to ensure the piece is suitable for its intended application.

Gather Co is pleased to provide direction as an addition to the product sale. In all cases, we recommend following the advice of qualified and experienced horticulturalist or landscape professional.

The following instruction is to be used in conjunction with the relevant Australian Standards.

Gather Co has partnered with industry leaders to supply the very best in vital accessories to our Feature Décor collection. When using these accessories, always follow the manufactures specifications.

Our chosen brands are:

Pot bags:

EverGrow New Zealand: +64 272 778 408

[evergroworchard.nz](http://evergroworchard.nz)

Sealing:

AquaMix: 1800 331 012

[www.aquamix.com.au](http://www.aquamix.com.au)

Deciding on a selection from our Marble Planter range must include the following considerations:

- Sealing
- Drainage
- Stability & positioning
- EverGrow Pot Bags
- Seepage &

## Sealing

Pieces within this collection are sculpted out of assorted marbles from various quarries. Each stone variety has the capacity to react when exposed to moisture and oxygen. We highly recommend completely sealing our Marble Planters with AquaMix - Sealers Choice Gold before installation. This will significantly aid in limiting discolouration to ensure the marbles original aesthetic is maintained for an extended period.

A minimum of two coats must be applied. Please refer to the AquaMix - Sealers Choice Gold Product Data Sheet for full directions or contact them directly:

1300 278 264 or [info@aquamix.com.au](mailto:info@aquamix.com.au)

## Drainage

Certain pieces within the Gather Co Marble Planter collection do not come with drainage holes. Where this is the case, it's the installers responsibility to drill the necessary opening if required. Ensure this task is undertaken by a qualified trade professional. We suggest using a battery-operated drill with

an appropriate masonry bit. Rotate slowly and DO NOT use the hammer function. The planter's structural integrity may be compromised if this procedure is not followed correctly.

## Stability & Positioning

Surfaces hosting Marble Planters must be appropriate. It is essential to ensure the intended site is level, accessible, durable and rated to support the significant weight associated with both empty and planted-out pieces.

Exposure to various elements including wind must be accounted for, as this can cause toppling. Pedestrian thoroughfares, domestic animals and children may also present potential triggers for toppling.

## EverGrow Pot Bags

Gather Co has partnered with EverGrow New Zealand to develop a range of purpose-built Pot Bags. These synthetic vessels are specifically designed to restrict and manage growing roots.

When correctly applied, they help to reduce overall weight of installed planters and promote healthy root generation. We highly recommend the application of EverGrow Pot Bags whenever planting-out any of Gather Co's Marble Planters. Please refer to the EverGrow Pot Bag "Tips for Installation" for further direction on the correct use of this accessory.

## Seepage

Once installed, Marble Planters typically release organic soil pigments through the base drainage hole. This may result in discolouration to surrounding surfaces. Gather Co takes no responsibility for stains generated as a result of this natural discharge. Practical steps must be taken to manage or accept

the inevitable effects of runoff which, is exaggerated over time as plants are watered, or the piece is exposed to rain/moisture. Gather Co offers purpose made marble plates to help catch excess seepage.

Unfortunately, not all designs come with this accessory.

## Product Variation

Our Marble Planter collection is almost entirely handmade. Please expect variation in size, shape, texture, colour and finish. This variation has been accounted for during the design process and Gather Co believes that it is precisely this unique character that gives each piece its authentic appeal.

We have attempted to group products according to aligning characteristics but, it must be understood that this is a guide only. Please request further detail when making selections to ensure your expectations are met.
