Alfresco

Custom Design

The InnerFlame Table sparks an exciting new era in open-air heating and alfresco wining and dining. The Innerflame table creates comfortable heat rising around your body while the contemporary glass top ensures drinks stay cool.

Winner of the Good Design Award in the Product Design Furniture and Lighting in recognition for outstanding design and innovation. Australian made and owned.

"We could not be more appreciative of our Innerflame heaters. They have been the perfect solution for our outdoor space. They have not only provided heat and comfort all year round they have added the life the venue was desperate for. The tables start conversations daily and bring our guests together. The tables have resulted in an under utilised area of the hotel being now the most desirable spot to be."

Andrew Goldsmith
